It is not necessary for one to inquire very far to learn that law and justice are not such inseparable partners as they have been reputed to be. The most glaring discrepancies in the enforcement of law are found in bold relief at the penitentiary. There the inequalities of sentence find focus.

The Governor is blamed if he pardons nany, but in the interest of justice he outrageous verdicts which come to his outrageous verdicts which come to his notice. He can equalize only in one way, and that is to reduce the sentence of those who by comparison or in reality have been dealt with too severely. Sometimes, for political reasons, he will not interfere under any circumstances. One night the trains from the north and the south districts met at the penitentiary station. There was a batch of prisoners from each direction and in each batch there was one man convicted of weedless than a second control of the control of the

One of the granger counties once sent a boy up for burglary who had lost one leg, one arm, and the forelinger and thumb off the remaining hand. When the Governor pardoned the boy the local paper of the county said the poorhouse authorities had trumped up the charge for the purpose of getting rid of one of its regular boarders.

It is for such that there should be a reformary as a primary prison. One of
the boy convicts at Joliet is serving a
two-year sentence for the larceny of a
broken and rusty old stove from an untenanted house. He wanted it to

There is another instance of a negro
who is not really a criminal although he
is sentenced for larceny. A man who
owed him some money refused to pay
him and he seized the fellow's watch
without the formality of employing the
sheriff. He didn't know the law or he
would never have done so, and had he
not been still further ignorant he would

Cases are frequent where the mercenary motives of the State's attorney or
prosecuting officer lead to gross injustice
against petty offenders. In some counties the State's attorney is paid \$10 for
every indictment which hold against a
